

MARMO MECCANICA

LCH - Horizontal multi head polisher

The LCH machine is a multi head polishing unit for flat or arrised edges from 10 to 60mm thick. The LCH is belt driven, this type of machine means that all the pieces can continuously be fed onto the belt and move past a series of polishing heads.

In addition to flat polishing, the LCH is also equipped with heads for arrising the top and bottom edges if required.

DIMENSIONS OF INSTALLED MACHINE
